

SHREYASH KOSHTA

koshta.shreyash02@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

TECHNICAL SKILLS

Primary: TypeScript, JavaScript, React, Node.js, Express.js, SQL

Secondary: PostgreSQL, Redis, Drizzle ORM, TailwindCSS, TanStack Router, Socket.IO

Others: OIDC, OAuth 2.0, PKCE, JWT, Server-Sent Events

PROJECTS

Pulse

[GitHub](#) | [Live](#)

- Engineered a real-time, full-stack live polling application featuring instant WebSocket synchronization, anonymous participation safeguards, and temporal voting velocity analytics.
- Mitigated anonymous submission spamming by implementing an HTTP request fingerprinting mechanism, enforcing strict single vote compliance without mandating user authentication.
- Integrated a custom OIDC authorization server microservice to handle authenticated session management, user specific poll dashboards, and distinct access controls.
- Utilized Drizzle ORM to perform aggregation queries for instantaneous live results and time-bucketed hourly voting metrics.

OIDC Authorization Server

[GitHub](#) | [Live](#)

- Built a fully functional OpenID Connect server from scratch implementing authorization code flow with PKCE, JWT signing/verification, and refresh token rotation without relying on external auth libraries.
- Developed the project to deeply understand the authentication lifecycle behind modern identity systems and OAuth-based login flows.
- Deployed as a standalone authentication microservice integrated across personal projects to provide real single sign-on.

1000 Checkboxes

[GitHub](#) | [Live](#)

- Built a real-time multiplayer shared canvas where any of 1000 checkboxes can be toggled live by connected users through WebSocket based synchronization.
- Implemented Redis pub/sub for horizontal scalability with PostgreSQL-backed persistence and optimistic UI updates in React.
- Integrated a custom OIDC authorization server to handle authentication and session management.

CERTIFICATIONS

Web Dev Cohort 2.0 — ChaiCode

EDUCATION

Parul University | Vadodara, Gujarat, India

Bachelor of Technology (B.Tech) in Computer Science and Engineering

Expected 2029
